“Pirates of the Caribbean” Docks into Fortnite BR

Blimey! Disney’s “Pirates of the Caribbean” has raised the cursed sails and docked into [Fortnite](#) as part of the Battle Royale v30.20 July 19 hotfix (“Cursed Sails”). Cast off with the ghostly Ship in a Bottle, explore Shipwreck Shallows, and hunt for buried treasure. Cursed Sails runs until **August 6 at 1 a.m. PT!**

Ship-“Wrecked”

Cursed Sails will have you aboard different kinds of vessels than what you’re used to in Wrecked. Use them in your adventure for buried treasure!

Ship in a Bottle

Unleash the spectral fury of the seven seas! Among other places, you can find a Ship in a Bottle inside Chests scattered in Shipwreck Shallows' pirate ship. Crack it open to bring forth a cursed ship from the ghostly depths that can dive into opponents with a devastating crash. You can also take aim at landlubbers from the crow's nest! After a short distance, the ship will dissipate.

Unvaulted: Pirate Cannon

Chart a course for the skies! Jump into one of the Pirate Cannons located around Shipwreck Shallows to launch yourself avast distance. Or roll it to a prime destination to launch a teammate into uncharted territory.

Unvaulted: Buried Treasure

Buried Treasure awaits on the Island! Hunt for treasure like the Flint-Knock Pistol and other loot using one of the Buried Treasure Maps in Chests and on the ground across the BR Island. X marks the spot, matey.

(Yes, the Flint-Knock is unvaulted too! You can also find this Pistol on the ground and from normal Chests.)
